

## Sponsor a Patient Program

Dealing with limb loss is a tremendously challenging experience. Beyond the immediate and substantial impact to function and mobility, there are often additional complications with employment, financial stability, psychological challenges, stigmas, and a host of other issues. Add in a lack of available resources faced by amputees in underserved countries such as the Dominican Republic and a devastating mix is created.

That is why providing someone with limb loss a prosthetic device is a truly life changing event. You not only help them to walk again or do activities of daily living that require two hands. Your support can also lead to an ability for the recipient to work and support their family. Along with generating an increase in confidence and self-worth. Seeing the impact from this gift of a prosthetic device and getting to know the person whose life you are changing is extremely rewarding.

It is an expensive endeavor to provide patients with these life-altering prosthetic devices, free of charge. To help support this important mission, and allow our benefactors to have a deeper connection to the patients they are helping, we have created the Sponsor a Patient program. With an **annual commitment of \$1200, or \$100 per month**, we will pair you with a patient on our waiting list. You will learn about them and their story, follow them throughout their journey to get fitted with a device, and hear the impact on their life after receiving their new arm or leg. These individual patient stories are incredible. They show the power of resilience in the face of adversity, the power of hope, and the power of giving to help someone in need. And you will know exactly how your donation to the cause has been put to work.

Please consider joining us and sponsoring a patient in need. You will change a life!

For more information or to sponsor a patient, please visit the Centro de Protesis website at [centrodeprotesis.org](http://centrodeprotesis.org). Thank you for your interest!
